WORK EXPERIENCE

ThreatLocker **July 2024 – Aug 2025**
Patch Management / Application Technician *Maitland, FL*

- Managed endpoint security policy deployment and application allowlisting across 100,000+ Windows and macOS endpoints in a multi-tenant zero-trust environment, supporting enterprise clients across multiple industries.
- Developed PowerShell scripts to automate update deployment for client-facing applications.
- Triaged and resolved configuration, patch deployment, and update failures by capturing log files, analyzing environment variables, and executing remediation steps across client domains.
- Designed and maintained an internal multi-OS virtual lab environment used for software validation, patch testing, and security hardening prior to client deployment — reducing failed updates and policy conflicts in production.
- Performed MD5/SHA256 hash verification and reviewed file paths, DLL dependencies, and executable behavior to support secure application allowlisting.
- Developed structured application bypass rules using file path and extension-based exceptions while maintaining strict zero-trust controls.

Orlando Health **Dec. 2022 – July 2024**
IT Service Desk Agent *Orlando, FL*

- Served as the first line of support for enterprise healthcare application incidents, requests, and technical issues across calls, tickets, and electronic communication channels in a live clinical environment.
- Resolved or escalated 200+ weekly tickets covering hardware, software, network, VPN, Citrix, Epic EHR, and phone-related issues, consistently maintaining a 98% customer satisfaction rate.
- Administered identity and access management for 30,000+ users via Active Directory, Microsoft 365, and Entra ID — including account resets, group assignments, and MFA compliance verification — while upholding HIPAA and customer security standards.
- Escalated issues to on-call personnel for prompt resolution of critical incidents.
- Maintained accurate documentation throughout the full support lifecycle — including incidents, resolutions, and escalation details — to drive continuous improvement and knowledge sharing.

CERTIFICATIONS & SKILLS

- **Certifications:** CompTIA Network+, CompTIA Security+
- **Skills & Tools:** Epic EHR, Windows, macOS, Linux, Windows Server, Microsoft 365, Active Directory, Entra ID/Azure AD, SCCM, Intune, Group Policy, PowerShell, Hyper-V, DNS/DHCP, VPN, Citrix, ServiceNow, Jira
